## NCL Fall 2025 Individual Game Scouting Report

Dear Ryan Bronder,

Thank you for participating in the National Cyber League (NCL) Fall 2025 Season! Our goal is to prepare the next generation of cybersecurity professionals, and your participation is helping achieve that goal.

The NCL was founded in May 2011 to provide an ongoing virtual training ground for collegiate students to develop, practice, and validate their cybersecurity skills in preparation for further learning, industry certifications, and career readiness. The NCL scenario-based challenges were designed around performance-based exam objectives of CompTIA certifications and are aligned to the National Initiative for Cybersecurity Education (NICE) Cybersecurity Workforce Framework published by the National Institute of Standards and Technology (NIST).

As you look to a future career in cybersecurity, we hope you find this report to be valuable in both validating skills and identifying areas for improvement across the nine NCL skills categories. You can use this NCL Scouting Report to:

- Validate your skills to employers in any job application or professional portfolio;
- Show case your achievements and strengths by including the Score Card view of your performance as part of your résumé or simply sharing the validation link so that others may view the detailed version of this report.

The NCL Fall 2025 Season had 8,520 students/players and 538 faculty/coaches from more than 490 two- and four-year schools & 200 high schools across all 50 U.S. states registered to play. The Individual Game Capture the Flag (CTF) event took place from October 24 through October 26. The Team Game CTF event took place from November 7 through November 9. The games were conducted in real-time for students across the country.

NCL is powered by Cyber Skyline's cloud-based skills evaluation platform. Cyber Skyline hosted the scenario-driven cybersecurity challenges for players to compete and track their progress in real-time.

To validate this report, please access: [cyberskyline.com/report/52NDBY2MNP13](https://cyberskyline.com/report/52NDBY2MNP13)

**CompTIA.** Based on the performance detailed in this NCL Scouting Report, you have earned **5 hours** of Continuing Education Units (CEUs) as approved by CompTIA. You can learn more about the NCL - CompTIA alignment via [nationalcyberleague.org/partners](http://nationalcyberleague.org/partners).

Congratulations for your participation in the NCL Fall 2025 Individual Game! We hope you will continue to develop your knowledge and skills and make meaningful contributions as part of the Information Security workforce!

Dr. David Zeichick  
NCL Commissioner

## NCL Fall 2025 Individual Game

The NCL Individual Game is designed for student players nationwide to compete in realtime in the categories listed below. The Individual Game evaluates the technical cybersecurity skills of the individual, without the assistance of others.

**1160<sup>TH</sup> PLACE**  
OUT OF 7873  
NATIONAL RANK

**1410** POINTS OUT OF 3000  
PERFORMANCE SCORE

**86<sup>th</sup>** National Percentile

Average: 974.0 Points

Average: 61.0%

Average: 40.1%

### Cryptography

**165** POINTS OUT OF 355

**46.7%** ACCURACY

COMPLETION:

70.0%

Identify techniques used to encrypt or obfuscate messages and leverage tools to extract the plaintext.

### Enumeration & Exploitation

**60** POINTS OUT OF 300

**30.0%** ACCURACY

COMPLETION:

37.5%

Identify actionable exploits and vulnerabilities and use them to bypass the security measures in code and compiled binaries.

### Forensics

**115** POINTS OUT OF 300

**75.0%** ACCURACY

COMPLETION:

60.0%

Utilize the proper tools and techniques to analyze, process, recover, and/or investigate digital evidence in a computer-related incident.

### Log Analysis

**200** POINTS OUT OF 300

**55.0%** ACCURACY

COMPLETION:

78.6%

Utilize the proper tools and techniques to establish a baseline for normal operation and identify malicious activities using log files from various services.

### Network Traffic Analysis

**60** POINTS OUT OF 300

**28.6%** ACCURACY

COMPLETION:

28.6%

Identify malicious and benign network traffic to demonstrate an understanding of potential security breaches.

### Open Source Intelligence

**280** POINTS OUT OF 385

**56.8%** ACCURACY

COMPLETION:

75.0%

Utilize publicly available information such as search engines, public repositories, social media, and more to gain in-depth knowledge on a topic or target.

### Password Cracking

**240** POINTS OUT OF 360

**76.2%** ACCURACY

COMPLETION:

69.6%

Identify types of password hashes and apply various techniques to efficiently determine plaintext passwords.

### Scanning & Reconnaissance

**150** POINTS OUT OF 300

**68.8%** ACCURACY

COMPLETION:

73.3%

Identify and use the proper tools to gain intelligence about a target including its services and potential vulnerabilities.

### Web Application Exploitation

**40** POINTS OUT OF 300

**100.0%** ACCURACY

COMPLETION:

8.3%

Identify actionable exploits and vulnerabilities and use them to bypass the security measures in online services.

Note: Survey module (100 points) was excluded from this report.

30

**100.0%**  
ACCURACY

COMPLETION:

**100.0%**

Introductory challenge on acceptable conduct during NCL.

### Cooking Breakfast (Easy)

**45** POINTS  
OUT OF  
45

**100.0%**  
ACCURACY

COMPLETION:

**100.0%**

Parse Chef (esolang) code to determine what input it requires.

### NotPetya (Easy)

**70** POINTS  
OUT OF  
100

**60.0%**  
ACCURACY

COMPLETION:

**75.0%**

Gather key information on NotPetya malware.

### Flamed (Medium)

**55** POINTS  
OUT OF  
55

**33.3%**  
ACCURACY

COMPLETION:

**100.0%**

Use open source tools to find patterns between GPS locations.

### Material (Medium)

**80** POINTS  
OUT OF  
80

**71.4%**  
ACCURACY

COMPLETION:

**100.0%**

Use the EDGAR database to filter 8-K filings.

### I Cee Stuff (Hard)

**0** POINTS  
OUT OF  
75

**0.0%**  
ACCURACY

COMPLETION:

**0.0%**

Use ICS/OT OSINT tools do passive recon on infrastructure.

## Password Cracking Module

Identify types of password hashes and apply various techniques to efficiently determine plaintext passwords.

### Hashing (Easy)

**40** POINTS  
OUT OF  
40

**50.0%**  
ACCURACY

COMPLETION:

**100.0%**

Generate hashes for passwords with the MD5, NTLM, and SHA256 hashing algorithms.

### Crack You One More Time (Easy)

**50** POINTS  
OUT OF  
50

**80.0%**  
ACCURACY

COMPLETION:

**100.0%**

Crack MD5 and SHA1 password hashes using password cracking tools.

### Oph the Dome (Easy)

**40** POINTS  
OUT OF  
60

**100.0%**  
ACCURACY

COMPLETION:

**66.7%**

Crack Windows NTLM password hashes using rainbow tables.

### Redacted (Medium)

**50** POINTS  
OUT OF  
50

**100.0%**  
ACCURACY

COMPLETION:

**100.0%**

Crack an insecure password for a protected PDF file and recover redacted information.

### MasKquerade (Medium)

**60** POINTS  
OUT OF  
60

**100.0%**  
ACCURACY

COMPLETION:

**100.0%**

Build a wordlist or pattern rule to crack password hashes of a known pattern.

### Enterprise (Hard)

**0** POINTS  
OUT OF  
100

**0.0%**  
ACCURACY

COMPLETION:

**0.0%**

Build a wordlist to crack passwords not found in common wordlists.
